

COLLECTIONS

Generate collection strategies.
Manage behavioral data.

Implement personalized strategies for preventive management and for early, mid, and late-stage collections

→ Integrate

with studies, bureaus, collection allocation systems and banks, with simultaneous operation in different countries.

→ Automate

your calculations, scores, data extraction, indicators, messaging, reminders, among others.

→ Segment

your strategies by various variables with specialists. Prioritize and personalize the speech according to profile, channel, and recovery probability.

→ Perform

with monitoring dashboards and alerts with customized indicators. Generate changes in minutes and deploy in real-time.
